

SENATE SECRETARIAT

“QUESTIONS FOR ORAL ANSWERS AND THEIR REPLIES”

to be asked at a sitting of the Senate to be held on

Wednesday, the 2nd May, 2012

1. ***Begum Najma Hameed:** (Notice received on 13-03-2012 at 15:45 p.m.)

Will the Minister for Water and Power be pleased to state the present status of the project of power generation from Thar Coal?

Syed Naveed Qamar: The present status of Power Generation Projects from Thar Coal is given below:—

(a) Block-II: JV Project between GOS-Engro Group

One of the major initiatives of the present Government was to enter into a Joint Venture with the leading industrial group of the country viz. the Engro group (40% Sindh Government; 60% Engro) for Block-II of Thar Coalfields. The company plans to develop an open pit mine of 6.5 million ton per annum capacity and power generation of 1200 MW at the cost of US\$ 3 bn.

Bankable Feasibility has been completed in August, 2010. This flagship project of the GoS is part of the projects taken up by the Pak-China Joint Energy Working Group. Chinese financial institutions are willing to finance this project provided they get a green signal from the Chinese govt. Next meeting of JEWG is scheduled to be held on May 7-8, 2012 at Islamabad.

(b) Block-VI Oracle Coalfields PLC UK

Detailed Feasibility Study completed and approved by the Technical Committee of Sindh Coal Authority in Jan. 2012. They planned to construct 5 million ton per annum mine and 300 MW Power Plant in first phase. Oracle has also entered into agreement with KESC for Power Plant. The pre-development ground work for mine will commence in May, 2012 and mine development would begin by first quarter of 2013.

(c) Block-I: Sino-Sindh Resources (Pvt) Ltd.

Block-I of Thar Coalfield was allocated to Sino-Sindh Resources (Pvt) Ltd, a subsidiary of Global Mining of China through International Competitive Bidding in September, 2011. They have completed the Detailed Feasibility Study recently. Sino-Sindh intends to construct 10 million ton per annum mine and 900 MW Power Plant in first phase by 2015.

(d) Block-V Underground Coal Gasification Project

The Planning Commission approved an R&D Project and engaged Pakistan's most renowned scientist Dr. Samar Mubarakmand to develop a local technology and execute the Pilot Project. The Project is for production of Syngas from Thar. Based on Syngas Power Plant of 100 MW can be established. An amount of Rs. 984.93 million has already been released for production and purification of syn gas.

Test Burn was ignited on 11th December, 2012. Syngas is being coming out from the underground cavity created by drilling, casing, cementation and Reverse Combustion.

As decided by the TCEB an international EOI for establishing 100 MW is being floated by PPIB & TCEB to attract foreign investment.

2. ***Mrs. Nuzhat Sadiq:** (Notice received on 14-03-2012 at 09:45 a.m.)

Will the Minister for Water and Power be pleased to state:

- (a) the ratio of alternative energy produced in the country through all alternative sources which was added in the national grid as on 15th March, 2008 and 15th March, 2012, respectively;*
- (b) the names, specification and present status of programmes / projects of alternative energy which were in progress on 15th March, 2008;*
- (c) the names, specification and present status of the said programmes / projects launched during the present regime; and*
- (d) the amount spent on the alternative energy since March, 2008 with year-wise and project-wise break up?*

Syed Naveed Qamar: (a) As of March 15th 2008, no energy was added to the National Grid from the Renewable Energy Resources.

Since 15th March 2008, the Government has taken a number of steps to create an enabling environment for the private sector to invest in Renewable Energy projects in the country. The steps include:

- (a) Amendment of Grid Code to enable grid to accept wind power,
- (b) preparation and announcement of Standard Documents such as Energy Purchase Agreement (EPA), Implementation Agreement (IA), Land lease Agreements etc.;
- (c) Announcement of upfront tariff,
- (d) Special financing from the State Bank for RE based power production; etc.

Because of these initiatives the private sector investors have shown keenness to invest in this sector and there are already projects in the pipeline that will yield over 1500 MW power by the next year. Currently, 6 MW Wind (Zorlu Energy); 7 MW Biogas project by Shakarjang Sugar Mills; and 27 MW plant at Al-moiz Sugar Mills in D.I. Khan are providing electricity to the grid.

(b) AEDB had the Rural Electrification Project in progress on March 15, 2008. The project comprised of provision of 3000 Solar Home Systems in 49 villages of district Tharparker, Sindh. The project was successfully completed in 2009.

(c) Wind : On Grid
